To customers and business partners of  
STOCKO CONTACT GmbH & Co. KG

► Topic Gas supply information  
► Date 05. August 2022

Dear Sir or Madam,

Concerning the overall Gas supply in Europe, as well as the possible economic impact, be informed that STOCKO will keep the focus on this major circumstances.

**Actual situation for direct gas consumption:**

The natural gas consumption in STOCKO is mainly for the heating of the buildings. The production process is quite independent of natural gas.

**Actual situation for indirect consumption is more difficult:**

Each process in delivery chain which is energy intensive (e.g. granulates, or products from heavy metal suppliers) can maybe affected.

From today's point of view, production and deliveries are safe.

Possible changes of the situation are reassessed by our teams to identify negative effects in the supply chain and to keep potential risks for our customers and business partners as low as possible.

In case of specific questions, please contact directly your STOCKO Key Account.

With kind regards

STOCKO Contact GmbH & Co. KG
